

Innovative POWER-LOCK® Solutions

Consider these additional types of POWER-LOCK for your operation. Each is designed to provide keyless locking power for special applications.

TF Series

Applicable shaft size: 18 to 90 mm

- Designed for hubs with smaller outside diameters.
- Self-centering function aligns the hub and shaft during installation.

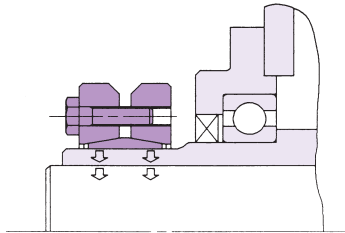

SL Series

Applicable shaft size: 19 to 245 mm

- Connects to the outside of the hub.
- Suited for applications where a thick hub is not possible.
- High transmissible torque.

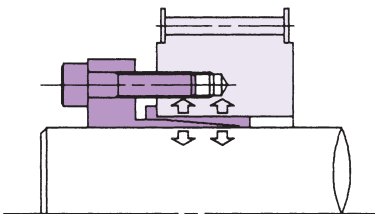

EF Series

Applicable shaft size: 10 to 120 mm

- Same inner and outer diameter as the EL Series.
- Small ratio between inner and outer diameters allows for smaller hub diameters.

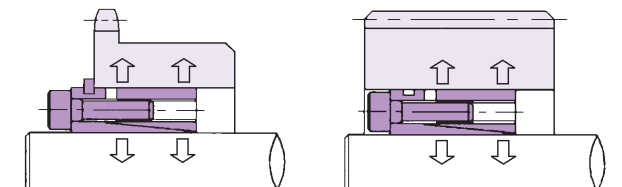

RE Series

Applicable shaft size: 5 to 50 mm

- Stainless steel construction.
- Designed with a convenient removable flange.
- Excellent for small shaft diameters.
