

*Maintenance made easy*

# Pro-Guard™

## *Lining your lifts for better operation*

U.S. Tsubaki, manufacturers of Union® Chain, understands the importance of proper chain maintenance. That's why we partnered with Poly Hi Solidur Worldwide to bring you Pro-Guard™ liners to improve your operation.

Pro-Guard™ liners provide real benefits.

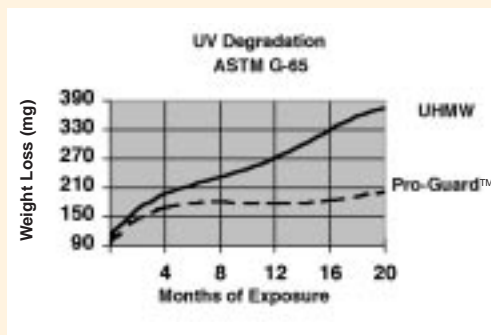

- **Improve inspection procedures with built-in wear indicators.** The dual color-coded system built into each liner makes it easy to spot trouble areas before they become serious problems.
- **Stand up to your operating environment.** They are specially formulated to resist abrasion, UV rays, and chemicals, extending the life of liners and chains.
- **Simplify and improve maintenance procedures.** The exclusive fastening system means quicker, easier installation, saving time and money. Specially designed gradient ends and attachment holes help eliminate peaks and valleys from thermal contraction and expansion.

Protect your chain and get smoother operations with Pro-Guard™ liners.

Pro-Guard™ is available in these configurations.

*Count on U.S. Tsubaki for the tools  
you need to stay up and running.  
For the ride of a lifetime, call today.*
