

Pro-Coat™

Maintenance made easy

Powerful lubrication for general maintenance

U.S. Tsubaki, manufacturers of Union® Chain, understands the importance of proper chain maintenance. That's why we partnered with Kluber Lubrications to bring you Pro-Coat™ lubrication to improve your operation. This specially formulated grease is designed to penetrate deeper than standard grease, enhancing scheduled manual chain lubrication of all lift and water rides.

- Extend the life of your chain—and your investment—with better lubrication.
- Provide better corrosion resistance and reduce the risk of chain seizure.
- Seal joints from water penetration.
- Resistant to mild alkaline and acid solutions.
- No floating sheen on water containment areas.
- Environmentally friendly.

Pro-Coat™ stays on longer, even in wet and rainy conditions, so you get better lubrication—and save time and money.

Method of Application: Use standard manual greasing practices.

Color: Pro-Coat™ goes on beige, but becomes opaque after drying. The dispersion is nonstaining.

Container Sizes: Pro-Coat™ is available in 25-kilogram pails.

*Count on U.S. Tsubaki for the tools
you need to stay up and running.
