Costs down – service life up
Cable carrier systems for Oil & Gas, Mining and Drilling

Where the atmosphere is highly explosive and no mistakes should be made – where extreme conditions and requirements prevail, only proven products can exist. And this is exactly where our cable carriers prove themselves. They meet all offshore standards and are characterized by superior safety and reliability. Be it the North Sea, the Mexican Gulf or Southeast Asia – since the early 1970’s we have been supplying cable carriers for offshore plants all over the world.

Safe system operation and the necessary explosion protection of our cable carrier systems are always our first priority. That is why our products are protected against electrostatic charging respectively discharging.

TOTALTRAX® Complete Systems
From planning to the final complete system

Use our know-how. Working jointly with you, our experienced specialists can provide pre-sale support, including planning and design services through after sales service and support.

One order, one contact person, components optimally matched to each other, including the cable and hose carrier, the electrical cables, the hydraulic and pneumatic hoses and the connectors. You receive the complete TOTALTRAX® system in one delivery.

Reduce your storage costs with TOTALTRAX®. We supply all components Just-In-Time to your production facility or directly to the installation site.

Supervised installation service
Our Oil & Gas, Mining and Drilling specialists are located around the globe and provide comprehensive technical support and project management:
- Intensive consultancy and site survey
- Development and construction according to customer specification
- Manufacturing and assembly of steel and plastic chains including all cables and hoses
- Installation service – even under difficult heavy-duty conditions
- Supervision of external installation work, commissioning and acceptance

Want us to optimize your operations?
That’s what we do.
